Projects

Hospital Management System (Group Project) 

April, 2025

- Built a full-stack system to manage patients, doctors, appointments and hospital workflows.
- Implemented role-based modules for front desk, doctors and operators using **React.js** and **Node.js**.
- Designed REST APIs with **Express.js** and **PostgreSQL** to handle medical records and scheduling.

Book Your Show – Movie Ticket Booking Platform 

Dec, 2025

- Built a full-stack ticket booking platform using **Flask** with 15+ REST APIs and blueprints.
- Engineered seat selection and booking workflows supporting 100+ seats per show with consistency.
- Deployed a production backend on **Render** with 10+ relational tables and automated DB seeding.

Course Projects

RISC-V MiniCPU Engine 

Nov, 2024

- Built a lightweight CPU simulator translating **RISC-V**-like assembly into 32-bit binary code.
- Implemented instruction assembler, register file and memory model using modular **C++** classes.
- Simulated arithmetic, memory and control-flow instructions with a pipeline-ready extensible design.

Cache Prefetching Schemes 

Oct, 2024

- Implemented Next-Line and One-Block Lookahead prefetchers in **SimpleScalar** L1 cache modules.
- Evaluated 4 benchmarks, reducing IL1/DL1 miss rates by up to **45%** compared to baseline.
- Analyzed CPI, IPC, AMAT and energy using **CACTI**, highlighting performance–energy trade-offs.
